

INNOVATION IN (BIO)ACTIVE WOUND MANAGEMENT

BiologiQ. Innovating Wound Healing

Established 2004

INNOVATION IN (BIO)ACTIVE WOUND MANAGEMENT

What BiologiQ can contribute to your markets.

BiologiQ

The Company

BiologiQ is an independent Netherlands based medical supplies company (2004), specializing and leading in the marketing, sales and distribution of innovative bio-active wound care products and therapies in The Netherlands and Europe.

Innovating Wound Healing

BiologiQ

Vision & Mission

BiologiQ is convinced that the future of wound care lies in the application of new bio-active solutions, geared to triggering and assisting the body's own regenerative powers and based on a growing understanding of the biology of healing processes in the (complex) wound.

This basic principle guides all BiologiQ's product selection, marketing and distribution efforts, with the ultimate aim of achieving higher treatment success rates, shorter healing times, more cost-effective wound care and an improved quality of life for patients.

BiologiQ

A comprehensive concept

BiologiQ is more than just a reseller

BiologiQ aims to provide total wound healing concepts to provide wound care professionals with more (cost) effective product and treatment solutions in the wound care and anti-infective field.

BiologiQ

BiologiQ has built up brand credibility

Because BiologiQ product selection and marketing has always been based on a clearly recognizable vision and consistent positioning in advertising, BiologiQ has become a distinctive and respected brand personality – notably in the Netherlands.

BiologiQ stands for high quality, state of the art products,
professional expertise and improved quality of life.

BiologiQ

Bridge between manufacturers and markets

BiologiQ has a proven track record in assisting medical devices manufactures to get established in markets which would otherwise have been difficult or cost prohibitive to access.

- Highly trained and dedicated sales force
- Each member with background in specialized wound care nursing
- Sales force involved in product documentation and marketing
- Exclusive range of classified (CE/GMP) wound care and anti-infective products
- On the ground marketing, sales and logistics support to local distributors

BiologiQ

Specialists working with and for specialists

From the start, it has been BiologiQ's conscious strategy to focus exclusively on the market introduction and support of innovative and advanced wound care products and therapies.

- Careful selection of international dedicated wound care partners
- Sales staff selected from professional wound care backgrounds
- International network of specialist wound care suppliers and experts
- Highly selective product range
- Consistent 'wound care only' specialist positioning in the market

BiologiQ introduceert de WondCirkel©

De BiologiQ WondCirkel is, naast het WCS classificatiemodel, ontwikkeld om in één oogopslag te laten zien hoe de verschillende BiologiQ producten elkaar opvolgen, overlappen en aanvullen in de diverse fases van het wondgenezingsproces, inclusief de factor 'zuurstof'.
